Cross-border cooperation is the future – Breast Health is an example

This title very accurately describes the visions and ideas of the project partners. The treatment of breast cancer represents a challenge for all countries throughout the world. This type of cancer is the most common disease in women. The improvement in breast health has high priority in Schleswig-Holstein and Southern Denmark, and initiatives toward the continued improvement of breast health have been launched on both sides of the border. The obvious question is: Why not share experiences and knowledge? So the idea of the INTERREG project was born! Highly committed partners from both sides of our border have come together - physicians, managers of governmental agencies and insurance companies, as well as participants from public associations and universities.

Cooperation in this field offers a chance to share medical and technical resources and capacities, to guarantee the short-term availability of medical services, such as early diagnosis programs.

Therefore, the partners agree to share their experiences from the initiatives and to learn from each other in the fields of medicine, organization, technology and quality assurance. This Final Conference will present the main findings and proposals of the project to a broader public audience in order to transform the virtual building of a Cross-Border Breast Cancer Center into reality.

Our project has demonstrated that a closer cooperation between our regions will make us more successful, meaning that this kind of cooperation has positive benefits for the women and health care providers in Schleswig-Holstein and Southern Denmark. Looking at our past history, some problems have been noted. There are some barriers in legislation but also in the thought processes of people involved. They must be overcome.

Our common region is one of strength – so let's work on this together – for the benefit of our citizens!

Prof Dr Roland Trill, Leadpartner

Final Conference Programme 24th of November 2010, 13:00h to 16:00h

- | | |
|--------|---|
| 13:00h | Welcome and Opening Remarks
Prof Dr Roland Trill,
University of Applied Sciences Flensburg |
| 13:15h | Welcome and Opening Remarks
Dr Bettina Bonde,
Ministry of Health, Schleswig-Holstein
Stephanie Lohse,
Council of Region Syddanmark |
| 13:45h | The Network View from Clinicians
