

## The Technical Aspects of Cross-border Cooperation

Peder Illum, MedCom

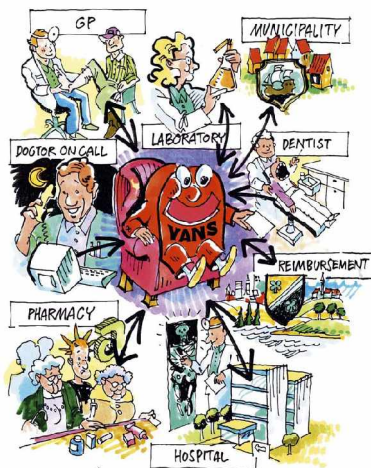

### Overview:

- What is MedCom?
- The Danish Health Data Network
- The KV-SafeNet
- The Connection of the Partners
- Difficulties and successes

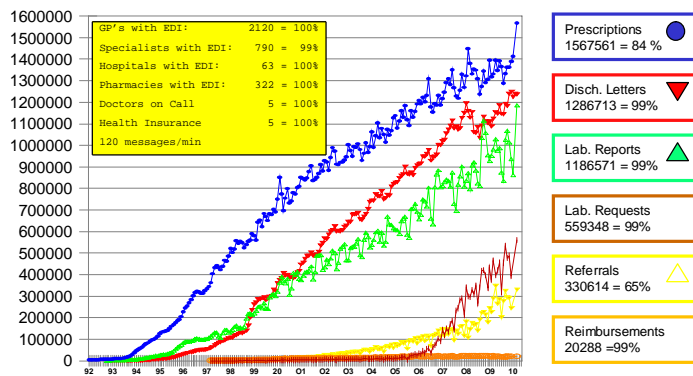

## What is MedCom?

*Medcom is a national non-profit project organization **developing, testing and disseminating** electronic communication via national healthcare communication standards*

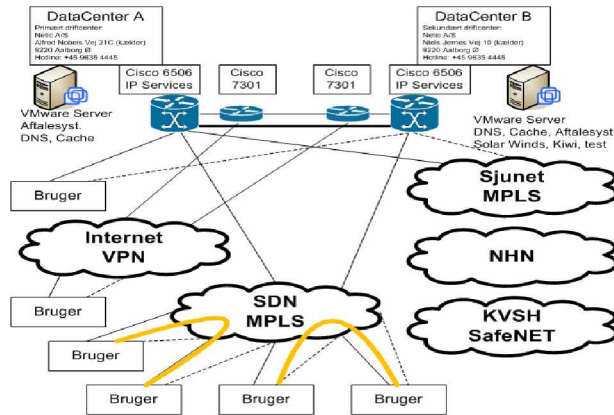

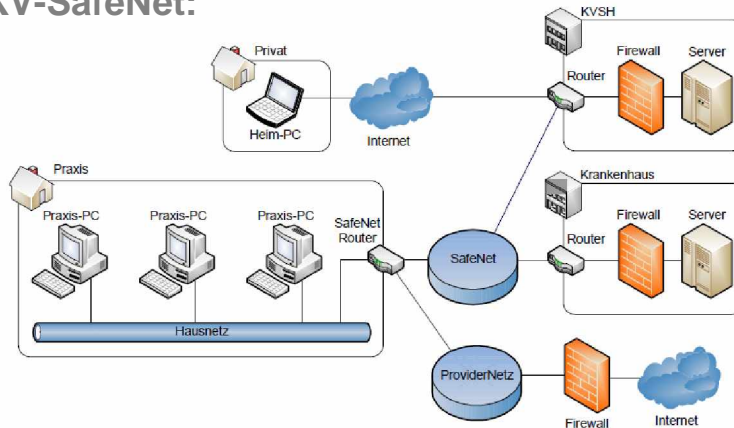

### MedCom -The Danish Health Data Network Messages/Month

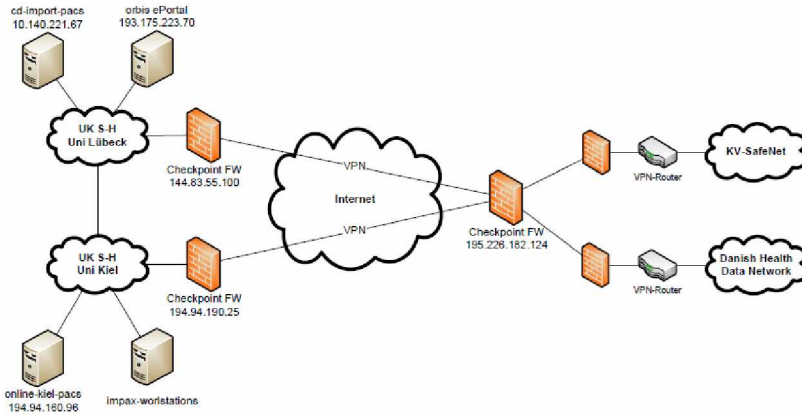

## The Danish Health Data Network

## KV-SafeNet:

Cross-border Collaboration in Population Breast Health  
in South Denmark and Schleswig-Holstein

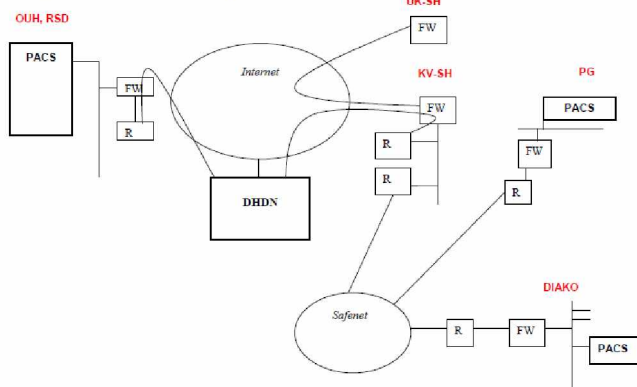

Cross-border Collaboration in Population Breast Health  
in South Denmark and Schleswig-Holstein

### The Connection of the Partners

*Illustration: the connection of the partners (RSD, DIAKO, UK-SH)*

## Difficulties and successes

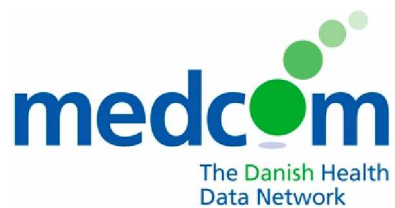

## Difficulties

- Understanding the DHDN security
- Legal issues
- Finding the right people
- Network security is a matter of trust
  - Who gives access to which network

## Successes

- Cooperative problem solving
- Process of establishing cross-border connection
- *Getting the pictures sent!*

*Thank you!*
